

# Masum Billah Sifat

Location: Bangladesh (City: Dhaka)

Phone: +880 1841618081

Email: [m.sifat1666690@gmail.com](mailto:m.sifat1666690@gmail.com)

LinkedIn: <https://www.linkedin.com/in/sifat-undefined-790513357/>

GitHub: <https://github.com/Masum-Billah-Sifat>

Portfolio: <https://sifat-portfolio-seven.vercel.app/>

## SUMMARY

Full-stack web developer focused on production-grade engineering. Started in 2022 with HTML/CSS/JavaScript and progressed to React and Next.js, building 100+ web applications independently. Strong in clean UI, responsive design, scalable APIs, and integrating AI/ML models into real web products. Currently building Tanmore, a multi-seller e-commerce platform for leather products across Bangladesh.

## CORE SKILLS

Frontend: Next.js (App Router), React, TypeScript, JavaScript, HTML, CSS

Backend: Golang, REST APIs

Database: PostgreSQL

Engineering: System design, authentication/token flows, scalable architecture

DevOps/Tools: Docker, CI/CD, Git/GitHub

Applied AI: Integrating ML models into web applications (API + UI integration)

## PROJECTS

### Tanmore Commerce Platform (In Development)

Portfolio: <https://sifat-portfolio-seven.vercel.app/projects/tanmore-commerce>

Demo Video: <https://youtu.be/yd9uQeV99EM>

Frontend Repo: [https://github.com/Masum-Billah-Sifat/leather\\_tanmore\\_marketplace\\_frontend](https://github.com/Masum-Billah-Sifat/leather_tanmore_marketplace_frontend)

Backend Repo: [https://github.com/Masum-Billah-Sifat/Tanmore\\_leather\\_marketplace\\_backend](https://github.com/Masum-Billah-Sifat/Tanmore_leather_marketplace_backend)

Tech Stack: Next.js, TypeScript, Go, PostgreSQL, OAuth, REST

- Building a production-grade, multi-seller e-commerce platform for leather products across Bangladesh.
- Implemented secure Google OAuth authentication with access/refresh tokens and strict session handling.
- Built complete commerce workflow: cart management, shipping address, checkout, and order confirmation.
- Designed seller capabilities: product management, reviews visibility, and order tracking via seller dashboard.
- Developed with PostgreSQL-backed data model and production-oriented API design.

- Implemented media upload handling for product assets (images/videos) with a scalable approach.
- Status: Active development; not publicly deployed yet.

### Business Portfolio Website (Iraq) (Deployed)

Live Website: <https://www.ebdaaaltakwenco.com/>

Portfolio: <https://sifat-portfolio-seven.vercel.app/projects/geospatial-risk-mapper>

Demo Video: <https://youtu.be/cgWtokzvNvo>

Repo: <https://github.com/Masum-Billah-Sifat/iqbaltaqween>

Tech Stack: Next.js, SEO, Responsive UI

- Built a professional portfolio website for a businessman based in Iraq to support international client outreach.
- Implemented SEO-focused structure: optimized metadata, keyword-oriented sections, and performance-friendly pages.
- Delivered a responsive, credibility-focused UI designed to improve trust and lead generation.
- Deployed publicly and used in real business outreach that contributed to securing a Bangladesh-related contract.

## EXPERIENCE

Independent Developer / Personal Projects (2022 – Present)

- Built 100+ web applications independently covering UI development, frontend architecture, backend integration, and deployment.
- Focused on production-quality patterns: authentication, data flow, maintainability, and performance.
- Integrated AI/ML functionality into web apps by connecting models through APIs and presenting results in clean UIs.

## EDUCATION

University of Dhaka

## LANGUAGES

Bangla (Native), English (Fluent)

## ADDITIONAL

Open to: [Full-time / Internship / Contract]

Preferred Roles: [Frontend / Full-stack / Backend]

Availability: Anytime
